

## ATAG's exclusive Magna Design Line

### The ultimate ATAG product

The Magna Design Line is an exclusive range of superior, high performance kitchen appliances. Fused to the broader ATAG range the Magna Design Line combines to create the ultimate designer appliance offer. Distinct, timeless, and contemporary designs blended with the highest quality and performance ... the ultimate in style and substance.

Magna Design Line products are made from beautiful, brushed stainless steel or ceramic glass, producing an outstanding high-quality finish and a specification that delivers the very best in aesthetics and performance levels.

Hand crafted and sophisticated, the Magna Design Line represents visual and functional excellence.

### Style and substance

The handcrafted materials used to create the Magna Design Line are exceptional in their quality and finish. The fascia, trim, handles and control knobs are hand finished and of the highest quality to create a tactile feeling of quality.

Quality is integrated into the beautiful design, which combines sharp, crisp lines blended with subtle curves. Glass and stainless steel are blended with cutting-edge technology to create unique styles, product features and exceptional but dependable performance.

### Timeless design

The use of pure materials such as ceramic glass and stainless steel, in combination with the unique characteristics of the Magna Design Line contrive to create desire and a statement of your intent today, tomorrow and for the future.

### Refined technology

Perfect detailing, functionality and adventurous styling coupled with the latest in technology combine to create Magna Design Line appliances. The products are designed for the most demanding situations.

ATAG customers aspire to visual impact and crave immediate desirability combined with sophisticated but intuitive functionality.

In other words...the Magna Design Line.

### Gas Hobs for outstanding wok cuisine

All ATAG gas hobs have powerful, efficient A+ burners designed in-house by ATAG. In addition to the A+ wok burner with a capacity of 4.5 kW, selected Magna Design Line hobs have an ultra high-power wok burner with a minimum capacity of 0.2 kW and a maximum capacity of

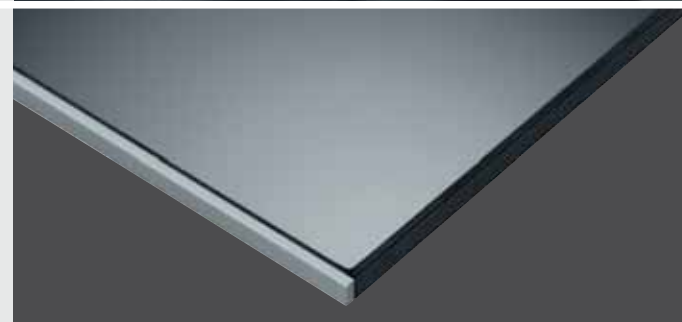

5.7 kW! A wok ring, is supplied for the extra stability of large woks.

### Subtle Stainless steel trim

The glass edges of ATAG Magna Design Line hobs are surrounded by a subtle, beautiful stainless steel trim. This is not only a delicate and impressive attention to detail, and extremely attractive, but it is also a safety feature.

Should you accidentally knock a pan against the edge of the hob, the glass is protected. All of the ATAG Magna Design Line ceramic and induction hobs have the stainless steel trim.

### Solid stainless steel control knobs

The control knobs used for the Magna Design Line hobs are made entirely of stainless steel, complementing the ovens and cooker hood aesthetics perfectly, creating design unity in your kitchen.

Attention to detail that can be seen and felt.

### Magna Design Line single ovens

Magna Design Line ovens benefit from touch control technology and flexibility and are sheathed in a stainless steel exterior, manufactured from 2mm gauge material. The solid stainless steel control knobs on the manual ovens provide a durable, reassuring feel for a professional and accurate level of control.

### Multi-System combination microwave oven technology

The Magna Design Line includes a cutting edge Multi-System single oven, finished in black glass with delicate stainless steel edge trim. The Multi-System technology allows for combination microwave cooking that blends maximum functionality with outstanding cooking results. Features such as an 800 Watt integrated microwave, electronic temperature regulation up to 300°C, Turbo Fan oven and economy and maxi-grills and Pyrolytic cleaning combine to create the ultimate all-in-one oven.

The range of contemporary Magna Design Line ovens compliment the attractive Magna Design Line gas, ceramic, induction and Domino Puzzle lines hobs perfectly, creating the ultimate partnership with the modern kitchen concept.

### Technologically advanced refrigeration

The ATAG Magna Design Line refrigeration range consists of innovative products that are among the very best. Precise, cutting edge temperature controls and flexible storage solutions guarantee optimum performance.

### Unique cooker hood solutions

The cooker hood is often the most prominently visible appliance in the kitchen and the ATAG Magna Design Line cooker hoods are designed for visual impact, performance and functionality. The combination of stunning exterior detail, contemporary designs, outstanding functionality and performance culminate in ultra flexible, easy to control ATAG cooker hoods. For example the halogen lighting and extraction settings regulate rapidly via precise, innovative electronic controls.

ATAG's unique extraction technology, the Air Logic system is also available within the Magna Design Line. It was designed to provide the best in noise reduction and extraction efficiency via filtration excellence, ensuring superb performance...style and substance!

The latest extraction system developed by ATAG is CENTRALLOGIC®. This is a combination of two extraction systems (mechanical ventilation and recirculation) specifically designed for homes and buildings with a central ventilation system.
